## Consulting, Engineering, Training

Pilz keeps you on the safe side!

► Our guiding principle:  
The spirit of safety

Our Pilz safety experts guarantee safe machinery and maximum availability of your plants around the world. With many years of experience and their extensive knowledge, they consider both national and international standards and regulations in order to develop individual solutions to the most complex safety issues in all industry sectors.

**From risk analysis to the declaration of conformity – we are there for you!**

**Let's talk about it!**

We are ready to listen to your concerns relating to machinery safety and are available to provide theoretical and practical help as well as service packages perfectly tailored to you.

► Overview of our comprehensive  
Pilz service portfolio

An infographic with a light grey background and yellow panels. It features four main service areas: Machinery safety, International Compliance and Acceptance, Workplace safety, and Training. Each area has an icon, a title, a brief description, a list of services, and a key benefit. The Training section is a wide horizontal bar at the bottom.

**Machinery safety**  
Safety through the whole machine lifecycle

- Risk Assessment
- Safety Concept
- Safety Design
- System Implementation
- Safety Validation

**Safe machinery at any stage**

**International Compliance and Acceptance**  
Conformity with international standards and regulations

- CE Marking
- USA
- NR-12
- UKCA Marking
- Machinery Compliance and Acceptance
  - Design Risk Assessment DRA
  - Factory Acceptance Test FAT
  - Site Acceptance Test SAT

**Compliant machines worldwide**

**Workplace safety**  
Absolute safety when operating machines

- Machinery Safety Evaluation
- Lockout Tagout System
- Inspection of Safeguarding Devices

**The maximum possible safety for man and machine**

**Training**  
International qualification programme and certified courses

**Enhancement of professional development**
